DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a multiple discharge load electronic ballast system and method having, inter alia, a plurality of electronic ballasts, operatively coupled to the distribution bus, wherein a respective electronic ballast comprises adaptations for respective local DC voltage control and an alternating current (AC) end output and has a maximum ballast power rating at the AC end output, wherein a sum of the maximum ballast power ratings of the plurality of electronic ballasts is greater than the nominal distribution power rating (claims 1 and 33); means for converting the DC distribution voltage at each distributed output into a respective local DC voltage output, and means for inverting each respective local DC voltage output into a respective alternating current (AC) end output having a peak power, wherein the nominal distribution power is less than a sum of the peak power of each of the AC end outputs (claims 20 and 27). The remaining claims 2-19, 21-26, 28-30 and 32 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1-30, ~~and 32~~ *and 33*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
